

# Industrial Embedded Systems 5th Annual Resource Guide

Product Profile Reservation Form - Deadline: March 15

## Computing

- Industrial systems  
Panel PCs, fanless computers, DIN rail computers, vehicle computers, programmable automation controllers, handhelds, wearables
- MCUs and SoCs  
Any industrial single chip device with processing and integrated analog I/O for sensors, or wired or wireless networking
- Operating systems  
Operating systems and kernels with industrial applications
- Small form factor modules  
3U, COM Express, EBX, EPIC, ETX, PC/104, SOM, SUMIT, or other small form factor module for industrial applications – less than 100cm<sup>2</sup> is a good guideline
- Devices and power supplies  
LEDs, bridges, controllers, power supplies for industrial use

## Human Interface

- Capture devices  
Cameras, frame grabbers, scanners, keyboard/mouse/trackball, voice input
- Display devices  
Display controller, flat panel, dynamic digital signage, touch screen, outdoor display, micro display, audio
- HMI software  
SCADA, graphical interface, video over IP, biometric, facial recognition

## Storage

- Storage hardware  
Data logger, data recorder, solid state storage, NAS, RAID
- Storage software  
SAN, iSCSI, data collection and reduction, file systems, security

## Networking

- Wireless networking  
Mesh networks, 802.15.4, Bluetooth, SP100, UWB, Wi-Fi, WiMax, Wireless HART, Wireless USB, ZigBee
- Wired networking  
CANopen, CC-Link, CIP, ControlNET, DeviceNET, EtherCAT, Ethernet/IP, Ethernet Powerlink, FL-net, FOUNDATION fieldbus, IDA, Industrial Ethernet, Interbus, LonWorks, Modbus, Profibus, ProfiNET, SERCOS-III, SDS, World FIP

## Sensors/Control

- Sensors  
MEMS, tilt, vision systems, biometric, mass, electromechanical, optical, RFID tags and readers, GPS
- Control  
Motion control, building automation, analog I/O
